

# PerformanceLED

## OSC Led Control Module

### Specifications:

The LedStrip module controls Led devices that can be used to control multiple Led strips over OSC.

Like all of our other devices they are supported within the PressureMesh Hub.

### OSC Control:

```
/ledstrip/on,1  
/ledstrip/off,1  
/ledstrip/brightness <0-255>  
/ledstrip/palette <0-255>  
/ledstrip/effect <0-255>
```

### CPU:

32 bit 160 MHz CPU 4mb FLASH  
Very low power consumption for battery operation  
Wi-Fi 802.11 b/g/n data communications

### Software:

Complete Free SDK for custom software design  
Example Open Sound Control Application with source code (visual studio)  
Example Wireless router (visual studio)  
Documentation API of Open Sound Control message format
